EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science (Threads: AI & Information Internetworks)

Atlanta, GA

Expected December 2026

EXPERIENCE

Atlassian

Seattle, WA

Software Engineer Intern

May 2026 – August 2026

- Engineered message tracing in TypeScript, propagating trace IDs in a 6-stage pipeline serving 80M+ messages/day
- Built Databricks SQL dashboard aggregating outcome data, enabling failure diagnosis & cutting debug time 50%
- Instrumented ML-driven ranking pipeline, inferring dropped messages via set-difference across candidate sets
- Built analytics for both real-time (SQS-based) & on-demand message delivery systems at scale with insights
- Integrated trace analytics with LLM-powered chatbot, surfacing message's full journey from single ID in seconds

Cox Automotive

Atlanta, GA

Software Engineer Intern

May 2025 – August 2025

- Added transaction logging to an Android app (Kotlin/Java), generating unique scan IDs & storing uploads in SQL.
- Integrated app with internal systems to sync IDs, ensuring reliable tracking of 5,000+ vehicles daily.
- Built a Rally tool (Python/FastAPI, React) to detect date mismatches, cutting planning errors by 80%.
- Developed a Slack bot with Rally & AWS Lambda for real-time alerts & updates, reducing manual date checks.
- Created a Spring Boot service exposing Splunk logs via REST, cutting retrieval time from minutes to under 5s.

Waystar

Atlanta, GA

Application Engineer Intern

Jan 2025 – May 2025

- Updated billing pages from PHP to Vue.js & Angular, cutting load times by 40% & improving doctor usability.
- Built a dynamic inquiry modal in PHP & JavaScript, letting doctors resolve billing questions 30% faster.
- Analyzed performance via Kibana logs & optimized high-latency JavaScript, reducing load times on critical pages.
- Created a Go-based SQL database to track SMS blacklists, ensuring notifications were blocked for over 50k users.
- Participated in Agile Scrum, contributing to standups, sprint planning, & code reviews for healthcare platform.

PROJECTS

Opscribe | React, TypeScript, FastAPI, PostgreSQL, pgvector, LangChain, Llama 3.3

Jan 2026 – May 2026

- Built a full-stack infrastructure intelligence platform modeling cloud systems as typed dependency graphs.
- Engineered BFS/DFS graph traversal for multi-hop dependencies, reverse impact tracing & blast-radius analysis.
- Built a pgvector RAG pipeline to embed & retrieve code, Terraform & infrastructure configs via semantic search.
- Developed a Llama-3.3-70B LangChain agent combining graph & RAG tools for analysis & IaC generation.

Taste of Atlanta | Python, Django, Google Maps API, JavaScript, HTML/CSS, AWS

Aug 2024 – Jan 2025

- Developed a full-stack web app with Google Maps API & Django backend to help users discover ATL restaurants.
- Implemented interactive map markers & info cards with JavaScript, improving usability & real-time data display.
- Built secure authentication with Django, supporting user login, favorites, & email-based password reset.
- Deployed on AWS Amplify with gunicorn & amplify.yml configuration, ensuring scalable & reliable hosting.

CommuRide Mobile App | React Native, Firebase, Google Maps API, Expo

Jan 2024 – May 2024

- Developed a ride-sharing app using React Native to promote sustainable commuting & reduce congestion.
- Implemented authentication & real-time sync with Firebase Firestore, enabling communication across devices.
- Integrated Google Maps API for route planning, geocoding, & directions to connect users with shared commutes.

Real-time COVID-19 Trends Dashboard | Tableau, AWS, Elasticsearch, Kibana, Docker

Dec 2022 – Mar 2023

- Developed a Tableau dashboard for real-time visualization of COVID-19 trends, improving reach of health data.
- Integrated live data streams & hosted the app on AWS EC2 with S3 storage, ensuring reliability and scalability.
- Implemented search & interactive visualizations with Elasticsearch & Kibana to enhance data exploration.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C#, HTML/CSS, Go, Lua, React, React Native

Frameworks/Libraries: Flask, Pandas, Django, Docker, Kubernetes, Selenium, Jest, .NET, React Navigation, Tableau

Services/Tools: AWS, Azure, Firebase, GCP, SharePoint, Render, Vercel

Certifications: AWS Certified Cloud Practitioner, MTA: Software Development Fundamentals
